KILLER<sup>DOLPHIN</sup>

THE BEST CHOICE  
Preferred by professionals

Roller KILLER 330 series from Blue Dolphin is a roller cover made from innovative material - microfiber blend - which absorbs and releases the paint and no fiber is left. The advantage of this roller is its uncomplicated assembly. Keeps its fluffiness after multiple use. Due to the cants at the edges roller leaves no fat edges.

Advantages of KILLER

- good rolling - doesn't slip when painting;
- can be used for variety of paints:rylic, latex, oils, both with matt and sheen effect;
- leaves no fiber;
- higher absorbance and better release of the paint
- uncomplicated inner assembly system;
- highly technological innovative filament;
- strong polipropylene tube, resistant to paint removers;
- keeps its fluffiness after multiple use;
- due to the cants at the edges roller leaves no fat edge.

Purpose:

- surfaces: semi smooth, slightly rough;
- painting effect: extra smooth.

330 Paint Tray

Blue Dolphin Paint Tray is perfect for storing paint during painting work and for even distribution on the roller surface. Thanks to the sloping, grooved surface, it is possible to squeeze excess paint from the roller that flows into the tank. The Blue Dolphin paint tray is easy to clean and is resistant to solvents. Recommended for use with the Blue Dolphin paint grid.

- Solvent resistant
- For all types of paint
- Available in three sizes
- Easy to clean

Paint Tray Refills

Blue Dolphin Paint Tray Refill allows for greater efficiency in the completion of painting projects by removing the necessity to clean out paint trays in between new colors or coats, or at the end of a painting session.

- Ideal, one-time use tray liner
- Perfect for painting rooms by using multiple colors
- allows you to save time on cleaning

Render Tape

Render Tape Blue Dolphin is designed to protect rough and demanding surfaces like: stucco, stone, concrete, brick. Excellent for applying stucco or painting or two different textured stucco surfaces. Render Tape is resistant to mechanical damages. Adapted to long-term exposure to external factors with ability to easily peel with no residues or damages. The special backing makes it easy to tear along and across.

Features of Render Tape

- Multi Surface. Adheres to concrete, stone, brickwork and painted surfaces.
- Clean removal up to 30 Days. Specially formulated adhesive, making it ideal for porous and rough surfaces.
- Premium Quality. Specially developed for the professional renderer as a masking tape that can be used with confidence in all situations.
- Tough and Hard Wearing. Strong mesh backing with weatherproof PE coating offers resistance to abrasion and external weather conditions.
- Easy tear
- General Purpose. Also suitable for holding and joining PE sheeting and as a general purpose tape on work and construction sites.

# BARRACUDA

## Duct Tapes

THE TAPE WITH TEETH!

Stronger Grip • Longer Lasting • Weatherproof

Barracuda Duct Tapes feature our new cutting edge technology that utilizes an advanced engineering process. Composed of a stronger heat-bonded 4-layer construction, this technology yields a superior and tougher tape that tears remarkably easy, while remaining exible, weatherproof and won't delaminate over time. Designed with an advanced SmartSkin backing, the adhesion is superior and longer lasting when compared to other traditional duct tapes.

## PROTECTIVE MATERIALS

### Plastic Drop Cloth

Cover foil is a classic construction foil designed to protect against dust and dirt. It is intended mainly for indoor use. BLUEDOLPHIN cover foil works well both during renovation and painting works. It is a tear-resistant product that effectively protects against splashes or dirt. Our offer includes five film thicknesses.

### Painter's Drop Cloth for professional

Painter's Drop Cloth for professional is designed to protect various surfaces during painting and general construction works. It is used to protect large, irregularly shaped items, e.g. furniture.

We offer Painter's Drop Cloth in two qualities – 40% stronger than other foils made from regrunulates and HDPE- high density polyethylene. Each quality has three degrees of strength and thickness.

- odorless;
- transparent or light blue;
- tear-resistant;
- UV resistant;
- resistant to weather conditions.

**Perfect for joining haylage bales, scaling, joining foils & repairing foil tunnels.**

## MIXING PADDLES

Width 71cm, height 240cm, depth 58cm

Dedicated to devices with a chuck, the tool must be inserted all the way to a loose chuck and immobilized by pressing the jaw rotating outer ring (in the case of fast clamping chuck appropriate tool should be placed in the tool holder and tightened a quick drill).

Dedicated to devices with running SDS. SDS consists of two oval recesses for fastening tools and two grooves, which edges transmit the torque. The instrument should be insert into the chuck and twisted until it locks independently.

Dedicated to devices with a thread. Fixing is carried out directly on the spindle of the device. The tool should be screwed into the device by hand, tightening occurs spontaneously during operation.

Paint Mixing Paddle

Emulsion paints, acrylic paints, lacquers, varnishes, other liquid materials.
